DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Kikinis discloses an apparatus for providing customers selected video information in a timely manner (Kikinis: column 1, lines 18-21). This apparatus comprises "receiving a request for video content from a remote client" (Kikinis: figure 2, item 52, wherein the remote client is the local subscriber), "establishing an application session on a first processor" (Kikinis: wherein figure 2 illustrates an application session or set of processes to be executed upon request by the client), and within the first processor "accessing a video content source to retrieve the requested video content" (Kikinis: figure 2, items 58 and 66). Kikinis further discloses "outputting the data stream of compressed video content to the remote client (Kikinis: figure 2, items 60 and 68, wherein the information is transmitted or outputted to the client or subscriber, column 6, lines 57-59, wherein the information is compressed using a MPEG compression scheme). However, this apparatus lacks the spatially and temporally compressed frames produced by two processors as claimed. This apparatus further lacks the array of processing nodes comprising $M*(N-1)$ communication ports. A further search was conducted which failed to yield any prior art. Therefore, the prior art fails to teach or render obvious these limitations taken within the others in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
